RMA Puget Sound:

Thriving in an Era of Digital Disruption

with JP Nicols

Please join RMA Puget Sound Chapter and JP Nicols on February 4th for a captivating discussion on banking and innovation strategy. You will have the opportunity to network and learn from experts in the banking industry.

The rise of FinTech is changing the banking landscape and raising the bar on customer expectations. But innovation is not just chasing the latest technology or the next big idea, it's about creating value. Learn about the hidden risks of not taking enough risks, and how financial institutions have to apply a portfolio approach to innovation too.

JP Nicols has been internationally recognized as a leading voice for innovation, strategy, and leadership, and his work has been featured in top publications and conferences around that world. He is cofounder of the Alloy Labs Alliance, the industry-leading shared innovation lab for community and mid-sized banks, and cohost of Breaking Banks, the #1 global FinTech radio show and podcast. He is also a top-rated instructor for his groundbreaking class and workshop on FinTech and innovation at the Pacific Coast Banking School.

JP Nicols - FinTech Forge, Co-Founder

JP is Cofounder of FinTech Forge, the industry leader in helping financial institutions build and leverage their innovation capacity through strategic fintech partnerships and investments, and the Alloy Labs Alliance, the world's first member-driven shared innovation lab and accelerator to help regional and community banks reduce risks, lower costs, and shorten the time between ideas and results.
